

The wide variety of colors as shown below combine with the many styles of Allmet Awnings to help you create a personalized look for your home. You can choose a color close to that of your home or you may wish to emphasize your windows by selecting a contrasting color. A third alternative is to choose one primary color with another color used as an accent stripe. You can complement your new awnings with a variety of Allmet Shutters in the same color selections.

Whatever style and color you choose, you are assured of the long-life, low maintenance features of Allmet's aluminum building products.
