

# Common problems with uncovered gutters

Clogged gutters don't allow rain water to drain properly and cause damage to your home.

Backed up water from clogged gutters can make its way through your roof and cause cracking, leaking and other serious interior damage.

Rotten fascia and soffit are common problems caused by clogged gutters.

Over time water stains turn to mold. Not only is this bad for your home, it's bad for your health.

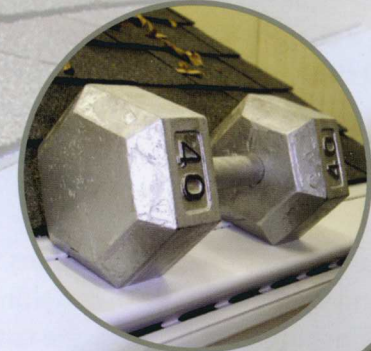

Over 700,000 accidents occur each year from falls.

Overflowing gutters cause water damage to your home and foundation. Water spills onto the ground which soaks, weakens, and cracks your foundation.

## LeafFree™ *The solution for today.*

LeafFree™ is engineered to stand up to added weight from snow & ice.

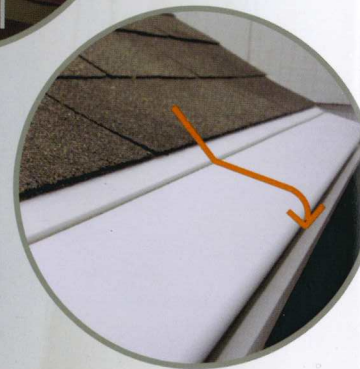

LeafFree™ can be installed on any roof pitch, hides uneven roof lines, and blends in with your trim. LeafFree's profile is virtually unseen from the ground.

LeafFree™ is offered in 14 colors plus copper. See reverse side for more information.

LeafFree™ is engineered to handle the heaviest rains on record.

## How it works

**LeaFree™** works on the scientific principle of water adhesion. The patent pending design allows water to enter the gutter while keeping leaves and debris out. The design allows **LeaFree™** to be custom-fit to any home by adjusting to any roof pitch.

The 1/2 inch horizontal opening is ideal to handle the heaviest rains and keep debris out.

**LeaFree™** has a low profile design that beautifies the look of your home by blending your gutters with the shingles and hiding unsightly metal flashing. It will add to the curb appeal and overall value of your home.
